#### **7.106 Additional requirements for major systems.**

(a) In planning for the solicitation of a major system (see part 34) development contract, planners shall consider requiring offerors to include, in their offers, proposals to incorporate in the design of a major system—

(1) Items which are currently available within the supply system of the agency responsible for the major system, available elsewhere in the national supply system, or commercially available from more than one source; and

(2) Items which the Government will be able to acquire competitively in the future if they are likely to be needed in substantial quantities during the system's service life.

(b) In planning for the solicitation of a major system (see part 34) production contract, planners shall consider requiring offerors to include, in their offers, proposals identifying opportunities to assure that the Government will be able to obtain, on a competitive basis, items acquired in connection with the system that are likely to be acquired in substantial quantities during the service life of the system. Proposals submitted in response to such requirements may include the following:

(1) Proposals to provide the Government the right to use technical data to be provided under the contract for competitive future acquisitions, together with the cost to the Government, if any, of acquiring such technical data and the right to use such data.

(2) Proposals for the qualification or development of multiple sources of

supply for competitive future acquisitions.

(c) In determining whether to apply paragraphs (a) and (b) above, planners shall consider the purposes for which the system is being acquired and the technology necessary to meet the system's required capabilities. If such proposals are required, the contracting officer shall consider them in evaluating competing offers. In noncompetitive awards, the factors in paragraphs (a) and (b) above, may be considered by the contracting officer as objectives in negotiating the contract.

#### **7.107 Additional requirements for acquisitions involving bundling.**

(a) Bundling may provide substantial benefits to the Government. However, because of the potential impact on small business participation, the head of the agency must conduct market research to determine whether bundling is necessary and justified (15 U.S.C. 644(e)(2)). Market research may indicate that bundling is necessary and justified if an agency or the Government would derive measurably substantial benefits (see 10.001(a)(2)(iv) and (a)(3)(vi)).

(b) Measurably substantial benefits may include, individually or in any combination or aggregate, cost savings or price reduction, quality improvements that will save time or improve or enhance performance or efficiency, reduction in acquisition cycle times, better terms and conditions, and any other benefits. The agency must quantify the identified benefits and explain how their impact would be measurably substantial. Except as provided in paragraph (d) of this section, the agency may determine bundling to be necessary and justified if, as compared to the benefits that it would derive from contracting to meet those requirements if not bundled, it would derive measurably substantial benefits equivalent to—

(1) Ten percent of the estimated contract or order value (including options) if the value is \$75 million or less; or

(2) Five percent of the estimated contract or order value (including options)

or \$7.5 million, whichever is greater, if the value exceeds \$75 million.

(c) Without power of delegation, the service acquisition executive for the military departments, the Under Secretary of Defense for Acquisition, Technology and Logistics for the defense agencies, or the Deputy Secretary or equivalent for the civilian agencies may determine that bundling is necessary and justified when—

(1) The expected benefits do not meet the thresholds in paragraphs (b)(1) and (b)(2) of this section but are critical to the agency's mission success; and

(2) The acquisition strategy provides for maximum practicable participation by small business concerns.

(d) Reduction of administrative or personnel costs alone is not sufficient justification for bundling unless the cost savings are expected to be at least 10 percent of the estimated contract or order value (including options) of the bundled requirements.

(e) Substantial bundling is any bundling that results in a contract or order that meets the dollar amounts specified in 7.104(d)(2). When the proposed acquisition strategy involves substantial bundling, the acquisition strategy must additionally—

(1) Identify the specific benefits anticipated to be derived from bundling;

(2) Include an assessment of the specific impediments to participation by small business concerns as contractors that result from bundling;

(3) Specify actions designed to maximize small business participation as contractors, including provisions that encourage small business teaming;

(4) Specify actions designed to maximize small business participation as subcontractors (including suppliers) at any tier under the contract, or order, that may be awarded to meet the requirements;

(5) Include a specific determination that the anticipated benefits of the proposed bundled contract or order justify its use; and

(6) Identify alternative strategies that would reduce or minimize the scope of the bundling, and the rationale for not choosing those alternatives.

(f) The contracting officer must justify bundling in acquisition strategy documentation.

(g) In assessing whether cost savings would be achieved through bundling, the contracting officer must consider the cost that has been charged or, where data is available, could be charged by small business concerns for the same or similar work.

(h) The requirements of this section, except for paragraph (e), do not apply if a cost comparison analysis will be performed in accordance with OMB Circular A-76.

[64 FR 72443, Dec. 27, 1999, as amended at 65 FR 46054, July 26, 2000; 68 FR 60005, Oct. 20, 2003]

#### **7.108 Additional requirements for telecommuting.**

In accordance with section 1428 of Public Law 108-136, an agency shall generally not discourage a contractor from allowing its employees to telecommute in the performance of Government contracts. Therefore, agencies shall not—

(a) Include in a solicitation a requirement that prohibits an offeror from permitting its employees to telecommute unless the contracting officer first determines that the requirements of the agency, including security requirements, cannot be met if telecommuting is permitted. The contracting officer shall document the basis for the determination in writing and specify the prohibition in the solicitation; or

(b) When telecommuting is not prohibited, unfavorably evaluate an offer because it includes telecommuting, unless the contracting officer first determines that the requirements of the agency, including security requirements, would be adversely impacted if telecommuting is permitted. The contracting officer shall document the basis for the determination in writing and address the evaluation procedures in the solicitation.
